## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This office action is in response to the amendment filed January 18, 2005.

#### ***Allowable Subject Matter***

The indicated allowability of claims 4, 8 and 9 are withdrawn in view of the newly discovered reference(s) to Fillion (U.S. 6,306,680). Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Fillion (U.S. 6,306,680).

Fillion (Fig 4, 8) discloses an intermediate semiconductor device fabrication structure comprising: an electronic chip component (102) having all electrodes (108) formed on one surface thereof, side walls (not labeled; perpendicular to surface with contacts) thereof being covered with a protective material (130) and wherein there is neither substantially or no protective material located on one surface of the chip where all the electrodes are secured to an adhesive sheet (126), with solder bumps (180) on each electrode.

With respect to the process limitations, such as "protective material...grinded or polished to a common level" and "...chip diced at a position of said protective material," the prior art product is the same as the claimed invention, which results in a single chip package that has protective material its side walls with two surfaces free from the protective material and electrodes on one of the surfaces. "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)
